# **Data Flow Diagram**

### **Pre Conditions**

List all conditions that must be true before the Business Policy can begin. This may include Business Events that must be completed prior to this Business Event.

### **Business Policy**

Identify all Business Policy that will be executed once the Business Event occurs.

## **Post Conditions**

List any special conditions that must be true when the Business Policy is complete. This may include additional Business Events that may now take place.

#### **Related Documents**

List all documents that in some way relate to or support this Business Event View. This may include legal, regulatory or organizational documents. It would be helpful to include the name of the document, its location and why it is significant.

### **Open Items**

List any open items that should be resolved concerning this Business Event. It is helpful to create some type of reference to the line item of the Business Policy where the Open Item exists.
